

# Stone, sand and gravel build Ontario

A strong infrastructure is key to Ontario's economic success and our quality of life. Vital infrastructure – schools, hospitals, roads, public transit, sewers and water mains, treatment plants and power generation stations – relies on a steady supply of stone, sand and gravel.

Ontario consumes more than **170 million tonnes of stone, sand and gravel each year** – more than any other natural resource. Demand isn't going away. A ready supply of stone, sand and gravel are essential to build and renew Ontario's vital infrastructure and maintain our standard of living.

Stone, sand and gravel. Essential materials for building a strong Ontario.

For more information about how stone, sand and gravel impact **every** aspect of your life in Ontario, visit [www.ontariossga.com](http://www.ontariossga.com)
